Contents of Volume 100

Number 1, 7 January 1983

CONWAY, F. J., A Proposed Model of Cancer as the Inappropriate Expression of Non-body Introns 1

KITATSUJI, Y. and KURODA, T., Statistical Study on Reverberation between Two Mutually Excitatory Neuron Groups . . 25

PAPAGEORGIOU, S. and VENIERATOS, D., A Reaction-Diffusion Theory of Morphogenesis with Inherent Pattern Invariance under Scale Variations 57

LUMSDEN, C. J. and HÖLLDOBLER, B., Ritualized Combat and Intercolony Communication in Ants 81

ROOT-BERNSTEIN, R. S., Protein Replication by Amino Acid Pairing 99

LEVITAN, E. and PALTI, Y., On the Thermodynamic Characterization of Membrane Gating Particles by Their Boltzmann Distribution 107

BASS, L., Estimates and Implications of Co-operativity for Enzyme Kinetics in the Intact Liver: Method of Flow Invariants . 113

MANKIN, R. W. and MAYER, M. S., A Phenomenological Model of the Perceived Intensity of Single Odorants 123

KLEIJN, W. B. and BRUNER, L. J., The Influence of Hydrophobic Ions and Dipolar Molecules on the Electrostatic Barrier in Biomembranes 139

QUELLER, D. C., Kin Selection and Conflict in Seed Maturation . 153

YOKOYAMA, S., Equilibrium Frequencies of α-globin Genes . 173

Index to Volume 100

Acquired variation, the cultural transmission of; effects of genetic fitness, 567
Aggregation error in nonlinear ecological models, 539
Alkaline elution, DNA, physico-chemical model for; new experimental evidence and differential role of DNA length, chain flexibility and superpacking, 341
Allometric approach to population cycles of mammals, 275
Amino acid pairing, protein replication by, 99
Ants, ritualized combat and intercolony communication in, 81

BASS, L., Estimates and implications of co-operativity for enzyme kinetics in the intact liver: method of flow invariants, 113
BELMONT, A. (see NICOLINI, C.), 341
Binary trees, comments on computing the similarity of, 427
Biomembranes, the influence of hydrophobic ions and dipolar molecules on the electrostatic barrier in, 139
BLUM, J. J. and HINES, M. H., Diffusion of Ca^{2+} and the quiescent response of sea urchin sperm flagella, 511
Boltzmann distribution, on the thermodynamic characterization of membrane gating particles by, 107
BOYD, R. and RICHERSON, P. J., The cultural transmission of acquired variation: effects on genetic fitness, 567
BRAMBILLA, G. (see NICOLINI, C.), 341
BREMERMANN, H. J., Theory of catastrophic diseases of cultivated plants, 255
BREMERMANN, H. J. and PICKERING, J., A game-theoretical model of parasite virulence, 411
BRUNER, L. J. (see KLEIJN, W. B.), 139
BULMER, M. G., Sex ratio theory in social insects with swarming, 329

Ca^{2+} diffusion and the quiescent response of sea urchin sperm flagella, 511
Calcium dynamics at a plastic synapse in *Aplysia*, 645
CALDER, W. A. III., An allometric approach to population cycles of mammals, 275
CALE, W. G., O'NEILL, R. V. and GARDNER, R. H., Aggregation error in nonlinear ecological models, 539
Cancer as the inappropriate expression of non-body introns, a proposed model of, 1
Catastrophic diseases of cultivated plants, theory of, 255
CAWOOD, A. H. (see SAVAGE, J. R. K.), 631
Cell division in culture, influence of the existence of a resting state on the probability of, 399
Cell–cell adhesion in the epithelium of an arthropod leg segment, a model for shape generation by strain and, 443
Cells, transplantable, hormone independent, in experimental mammary tumors, calculation of percentage of, 701
CHIANG, E. (see KOHN, M. C.), 551

Chromosomes, homologous, during DNA replication, the disparity between, 631
Code searching for sequence homology and DNA duplication, 319
Coevolution, protein, in the ecosystem "phage-bacteria", theoretical aspects of the problem, 185
Coevolution, protein, in the ecosystem "phage-bacteria", theoretical aspects of the deterministic model of microevolution, 197
Cognitive development, a neural theory of, 485
Combat, ritualized, and intercolony communication in ants, 81
Communication, intercolony, and ritualized combat in ants, 81
CONWAY, F. J., A proposed model of cancer as the inappropriate expression o non-body introns, 1
Co-operativity for enzyme kinetics in the intact liver, estimates and implication of; method of flow invariants, 113
CRAIG, R., Subfertility and the evolution of eusociality by kin selection, 379
Cultural transmission of acquired variation: effects on genetic fitness, 567
Culture, influence of the existence of a resting state on the probability of cel division in, 399
Cycles of mammal populations, an allometric approach to, 275

DE MELLO FILHO, A. C. (see MENEGHINI, R.), 359
Deterministic model of microevolution; some theoretical aspects of protein coevol ution in the ecosystem "phage-bacteria", 197
Development, cognitive, a neural theory of, 485
Diffusion of Ca^{2+} and the quiescent response of sea urchin sperm flagella, 511
Dipolar molecules and hydrophobic ions, their influence on the electrostatic barrie in biomembranes, 139
Diseases, catastrophic, of cultivated plants, theory of, 255
DNA alkaline elution, physico-chemical model for; new experimental evidenc and differential role of DNA length, chain flexibility and superpacking, 341
DNA duplication, an efficient code searching for sequence homology and, 319
DNA replication, the disparity between homologous chromosomes during, 631
DNA, superhelical model for regulation of gene expression, 239
DNA synthesis rate in mammalian cells irradiated with ultraviolet light: a mode based on the variations in the rate of movement of the replication fork and i the number of active replicons, 359

Ecological models, nonlinear, aggregation error in, 539
Ecosystem "phage-bacteria", theoretical aspects of protein coevolution in; th problem, 185
Ecosystem "phage-bacteria", theoretical aspects of protein coevolution in; th deterministic model of microevolution, 197
Edges, product term nonlinear lateral inhibition enhances visual selectivity for sma objects or, 525
Electric dipoles, hard core, the thermodynamics of a two dimensional system c (letter), 181
Electrostatic barrier in biomembranes, the influence of hydrophobic ions and dipola molecules on, 139
Elution, alkaline, DNA, physico-chemical model for; new experimental evidenc and differential role of DNA length, chain flexibility and superpacking, 341

Enzyme kinetics in the intact liver, estimates and implications of co-operativity for; method of flow invariants, 113
Enzyme-ligand dissociation and microviscosity, 675
Enzyme-ligand dissociation, effect of viscosity on; role of the microenvironment, 211
Enzymes subject to very strong product inhibition, kinetics of; analysis using simplified integrated rate equations and average velocities, 597
Epithelium of an arthropod leg segment, a model for shape generation by strain and cell–cell adhesion in, 443
Equilibrium frequencies of α-globin genes, 173
Eusociality, evolution by kin selection, and subfertility, 379
Evolution of eusociality by kin selection, subfertility and, 379

Flagella of sea urchin sperm, diffusion of Ca^{2+} and the quiescent response of, 511
Flow invariants method: estimates and implications of co-operativity for enzyme kinetics in the intact liver, 113
Fluid movement between intravascular and interstitial spaces, dynamics of, 305
Frequencies, equilibrium, of α-globin genes, 173
FUJII, T. (see HOSOYA, T.), 283
FUKUDA, M., Superhelical model of DNA for regulation of gene expression, 239

Game-theoretical model of parasite virulence, 411
GARDNER, R. H. (see CALE, W. G.), 539
Gene expression, superhelical model of DNA for regulation of, 239
Genes, α-globin, equilibrium frequencies of, 173
Genetic fitness, effects on the cultural transmission of acquired variation, 567
α-Globin genes, equilibrium frequencies of, 173
Graph-theoretical analysis of metabolic regulation, 293
GREEN, H. S. (see TRIFFET, T.), 645

Hard core electric dipoles, the thermodynamics of a two dimensional system of (letter), 181
HART, G. (see SLUYSER, M.), 701
HINES, M. H. (see BLUM, J. J.), 511
HIRSCH, H. R., Influence of the existence of a resting state on the probability of cell division in culture, 399
HÖLLDOBLER, B. (see LUMSDEN, C. J.), 81
Homologous chromosomes during DNA replication, the disparity between, 631
Hormone independent transplantable cells in experimental mammary tumors, calculation of percentage of, 701
HOSOYA, T., FUJII, T. and OGAWA, S., A molecular orbital study on the oxidation of hydrogen donor molecules by peroxidase compound II, 283
Hydrogen donor molecules, a molecular orbital study on their oxidation by peroxidase compound II, 283
Hydrophobic ions and dipolar molecules, their influence on the electrostatic barrier in biomembranes, 139

Insect olfaction, stimulus–response relationships of; correlations among neurophysiological and behavioural measures of response, 613

Insects, social, with swarming, sex ratio theory in, 329
Interstitial and intravascular spaces, dynamics of fluid movement between, 305
Intravascular and interstitial spaces, dynamics of fluid movement between, 305
Introns, non-body, a proposed model of cancer as the inappropriate expression of, 1
Ions, hydrophobic, and dipolar molecules: influence on the electrostatic barrier in biomembranes, 139
